Invisalign Payment Options

We believe everyone deserves to have a great smile, and have three payment options available to make Invisalign treatment affordable to all of our patients.

The cost of Invisalign varies from \$4500.00 to \$9000.00. The cost is determined by the complexity of each individual's case.

Option #1 – Full payment upfront, for which we offer a \$500.00 discount off the full fee. ** We also offer this \$500.00 discount to students. (not to be combined)

Option # 2 – An interest free payment plan. This requires a \$500.00 payment upon your first appointment, and a \$2000.00 payment a month later.

This \$2500.00 would then be deducted from your total cost and then divided into 8 equal monthly payment amounts, to be charged to your credit card on file.

Option # 3 - A longer payment plan is available with a Dental Financing Company, in which a loan of one to five years may be obtained at an interest cost of 3-9%.

We can provide you with the application details should this be of interest to you.

*** At the end of your orthodontic treatment, we will provide to you, a retainer (removable or fixed) at no additional charge (\$800.00 value)

** If orthodontic treatment is started within 30 days of the orthodontic consultation, teeth whitening will be provided to you at no charge (\$500.00 value)

Please speak to our administration team for any further questions or concerns, and to indicate which option is best for you.

Thank you for choosing us to provide your orthodontic treatment.
